

KNIT

Play

Knit believes architecture can elevate and transform lives, fostering community wherever we live, learn, work and play.

Play is where we focus on team dynamics, leisure, family development, friendship, continuing education and other joyful but indispensable elements of community life.

Fun matters.

DESIGNING COMMUNITY

“You shouldn’t focus on why you can’t do something, which is what most people do. You should focus on why perhaps you can, and be one of the exceptions.”

“The way that this building was designed (by Knit), it’s going to stand the test of time. The flow and floorplan is great. It’s very well used, and the kids can find their way around easily.”

Sustainability

As stewards of local community resources and landscapes, we have been charged with the dual missions of addressing the global problem of climate change and the aesthetic challenge of protecting open landscapes even as we accommodate growing populations within our communities.

At Knit, we consider it not only a responsibility, but an exciting architectural challenge to create structures and spaces that conserve our resources and honor our landscape. To us, it is an essential part of being a good member of the community.
